

# July 11<sup>th</sup> Team Earth Call

---

***This is a Clarion call to us all- Please listen and share as widely as possible to assist in the rebalancing of the earth and the healing of our families and communities!***

Our July 11th call was guided by *The Ones with No Names*. They described three aspects of our current Earth process—transmutation, transformation, and transcendence. They informed us that it is imperative for us to work with the earth in these ways for three months. They gave instructions in how to balance the situations in our lives that are discordant and guidance in assisting others as well. There was focus on the nuclear family and the importance now of creating an environment around our loved ones that holds them in balance.

They took us to the core of the earth and made it possible for us to feel the difference between what is happening there, below in the core of the earth, what is happening on the earth, and what is happening above the earth in the transcendent spaces of the dimensions. Feeling the differences informed us of how to work with all three of these levels and opened us to recognize how peace is created.
