

The Pillar of Light

The Pillar of Light is an etheric column of light, energy, and truth. It is created through the intention of beings physical and non-physical, who are focused on the union of all sentient beings—the earth, nature, the kingdoms, essences, elements, human beings, animals, creatures and all dimensions and levels.

Think of the pillar as thoughts, images, and prayers that turn and spin to bring oneness. As we weave together these intentions and prayers, we make a solid and even vehicle through which we can move our consciousness. As our consciousness moves, we can then assist the earth, other humans, and the invisible realm to come together as one breath or one organism, without beliefs.

The energy in the Pillar moves in a clockwise direction to unfold the potential of each person or energy that intends the union and/or uses the pillar. This clockwise movement is called “Christ Consciousness”, which means that it aspires to offer, reflect, and embody the highest frequencies possible. Union is possible when all beings bring their gifts or their potential to the earth.

When each person moves their potential from the inner Seed in the center of the body, bringing it to the pillar and sharing it as an energetic field, there are no words, rather a state of grace is shared. This state of grace offers a haven or a home for all beings to rest together in the co-creation of a “new world order”, or the promise of peace.

By turning the pillar on a daily basis, we offer our gift, connect with others, share in the heart of expansion, and open to experience the connection that exists all the time. We are made aware of what is, rather than being only in a place of separation with our thoughts, beliefs and conditioning. We are also able to give solace to others, as we send out our strength and open to receive what we need, in return. It is truly the place of home that is promised in the design and can be experienced now.
