

“These represent the heart of the world, even though they are from the country of my heart.

Heart of the World Flower Essences are not just for human beings that live now, not just for the human beings that are being born, and not just for our ancestors that we can follow in our genealogy – this is for the human race.”

Mary Magdalene

Heart of the World Flower Essences are an offering from Mary Magdalene. Harvested in the south of France, these very special Essences reflect a deep yearning from both the flowers themselves and the kingdoms of nature to bring Light to humanity. Working with our cells and systems, the Essences connect us with all life. They are created through the flower kingdom’s choice to empower humanity from the subatomic level, so that we more fully reflect the capacity for Oneness that is possible when we feel attunement with the Order in nature. This Order supports our cells and systems to function optimally, and brings forth our inherent capacity for being grounded, stable and strong in all of our levels.

In her infinite wisdom, Magdalene recognizes that the relationships with our subatomic level and with the kingdoms of creation are individual. Therefore, the Essences, dosage and length of usage are determined through connection with Magdalene. Our representatives have developed a relationship with Magdalene to provide this service for each individual during a consultation appointment.
